- Nuclear Consulting
- Design-Build Services for Power Plant
- Diving Inspection

Transportation Group

M&J specializes in all aspects of Intelligent Transportation Systems (ITS), Traffic Signal Systems, Variable Message and Wayfinding Signs, Communications and Security. We are currently working extensively with several regional clients in the design and construction of ITS applications. Our headquarters are in New Hyde Park, New York, where all of our ITS and Traffic Signal personnel are assigned. Our Technology Design & Implementation group currently includes four full-time professional members with extensive expertise in ITS, GIS, Traffic Signal Systems and Design, and Bus/AVL CAD applications. Due to our excellent performance and cost effectiveness of our delivery, the firm is growing significantly and we are routinely adding new distinguished staff that will continue to expand our capabilities.
